Graduating April 2027 | Available from May 2027 | Dublin based

ABOUT ME

Computing student at National College of Ireland, graduating April 2027. I worked as a backend engineer on payment systems, and the part of that job I liked most was the troubleshooting: taking a problem reported through support, working out what was actually happening, fixing it, and explaining it back in plain language. I am studying for the AWS Solutions Architect Associate certification and want to do that work full time in cloud support.

TECHNICAL SKILLS

- Cloud: AWS (EC2, S3, VPC, EBS, IAM); studying for the Solutions Architect Associate certification (SAA-C03)
- Networking: TCP/IP, DNS, HTTP and HTTPS, subnets and CIDR, the OSI model, from AWS study and my Computer Architecture, Operating Systems and Networks module
- Operating systems: Linux and Unix command line, shell scripting, z/OS UNIX System Services
- Troubleshooting: log analysis, incident response, root cause investigation, postmortems and runbooks, webhook and API debugging
- Databases: PostgreSQL, MongoDB, MySQL, Redis, SQL
- Languages and tools: TypeScript, JavaScript, Java, SQL, Docker, Git and pull request workflow, GitHub Actions

EXPERIENCE

Software Engineer, Afriex (payments) Jun 2024 to Dec 2025

- Worked with the support team on issues customers reported: traced each one to a root cause, fixed it, and explained what had gone wrong to colleagues outside engineering
- Took part in incident response, including a security problem in our webhook handling. I helped contain and fix it, then wrote the incident report and a runbook for the team
- Built and maintained integrations with third-party payment providers, covering API clients, transaction handling, webhooks and withdrawals, each provider with its own API and documentation
- Built a Redis-backed round-robin allocator for assigning virtual accounts across markets
- Worked in an agile team with pull requests, code review and automated tests

Backend Engineer Intern, Indicina (credit) Jun 2022 to Dec 2022

- Integrated a buy-now-pay-later service and wrote the API documentation in Swagger and ReadMe.io

EDUCATION

Higher Diploma in Science in Computing (NFQ Level 8, full-time) Jan 2026 to Apr 2027

National College of Ireland, Dublin. 83.7% average across completed modules

- Data Structures 89.5 | Algorithms and Advanced Programming 88.5 | Distributed Systems 86.8 | Software Development 83 | Computer Architecture, Operating Systems and Networks 80

Doctor of Veterinary Medicine Completed Nov 2024

University of Abuja, Nigeria. First Class Honours (4.53/5)

PROJECTS AND OTHER LEARNING

- Cairn (final year project, completing December 2026): peer study application where progress only counts once a spot-check assessment confirms it. Java Spring Boot, React, PostgreSQL with pgvector, and a retrieval-augmented generation pipeline that builds questions from each learner's own material. Deployed on AWS
- AWS She Builds mentorship programme, 2026. Tech Fundamentals, learn.cantrill.io, June 2026
- IBM Z Student Ambassador at NCI since July 2026. IBM Z Xplore Advanced and Concepts badges: z/OS, JCL, COBOL, Zowe, USS shell
- Class representative for my cohort at NCI
